Superintendent's Highlights

Highland School District, as many of the public schools, has been involved with the curriculum alignment process during this past school year. In addition, there has been research and work done by the staff in several content areas. Work with the local university has lead to discussion of creating a seamless curriculum for students to a post – high school experience with creation of classes in Math and Language Arts that will allow for success with basic competencies or dual college credit for on site classes.

All Juniors have either taken the COMPASS or ACT test this spring.

The staff is considering a skills leveling approach for teaching of Language Arts and Math for elementary students.

MAPS (given using computers) testing was piloted this spring. The district will continue with interpretation of data workshops in the fall of 2002 to continue implementation of this educational tool.
